New Homes Are Already in Course of Erec-

in the Big Fire. Ardmore, I. T., April 20.-(Special.) Already this city has begun to rise from its ashes and ruin, caused by yesterday morn-ing's fire. Several temperary business houses were erected to-day. As fast as the ruins cool the debris is removed and the work of rebuilding commenced. Not a hardware store escaped the flames and this delays rebuilding, but several carloads of material are in transit and will reach here leased for temporary court facilities and that the records in the United States marshal's office were saved and about one-half the records from the clerk of the court's office. The judges' hench docket, however, was destroyed and it is not likely that Judge Kilgore will be able to open the term of United States court set for the 30th of this month, as it will take at least a month to prepare a new docket.

The Judge Will Locate at Tablequah for

Washington, April 29.—(Special.) Judge Springer, of the Northern district of the Indian Territory, stated to-day that he would make Tahlequah his home during the summer, and after that would locate permanently at Muscogee, He will leave for the West in time to open court by the middle of next month.

permanently at Muscogee. He will leave for the West in time to open court by the middle of next month.

Judge Springer has come to the conclusion that Comptroller Bowler, in deciding that territory officials cannot draw pay until after they are confirmed, is incorrect. Before leaving for the West he will present a claim for a month's pay and will make an argument before the comptroller, with the hope of inducing him to change his decision.

The claim is now made that neither Springer nor Kilgore are eligible to the position to which they were appointed, a provision of the constitution makes any one voting to create an office or who votes to raise the pay of any office from holding the position thus influenced by his vote, either in the house or the senate. It is known that Kilgore worked hard for the emasculated court bill passed, in order to prepare a place to get into when he was forced out of congress, and it is also known that Mr. Springer took considerable interest in the matter and voted. It is said this point will be made against both when the matter of confirmation comes up and if they are turned down and the comptroller does not change his onlinon, neither can receive pay for services except by special act of congress. So it can be easily seen why Judge Springer is anxious to convince the comptroller that he is mistaken in his rulling.

CATTLE LEASES EXTENDED. secretary Smith Again Shows His Antipathy to the Settlers in the Indian

The secretary of the interior wired Indian Agent Baldwin at Anadarko to-day to extend the cattle leases in the Wichita, Klotend the cattle leases in the Wichita, Klo-wa, Comanche and Apache country to the same parties who now hold them. In ex-planation it is said the secretary did this because a message sent to the agent some days ago "mbcarried." This message is the one mentioned in the dispatches some days ago in which the agent was directed to receive bids for grazing leases and for-ward the same to the secretary, who would select the highest bidders and award the contracts, the money to go to the Indian fund.

In view of the fact that the message

make a most thorough examination of all the facts attending the punishment of this American citizen. He will also make a special examination into the legality under treaty stipulations of the trial of a citizen of a friendly nation by courtmartial instead of by the regular civil tribunals, as is customary and perhaps absolutely essential. Moreover, the case may involve the right of France to exercise jurisdiction over the internal affairs of Madagassar, from which she appears to have been expressly excluded by the treaty of 1855, which gave her only jurisdiction over the foreign relations of Madagassar.

The Washington friends of Mr. Waller are bringing all the influence possible to bear in his behalf upon the state department. Among other prominent men who have displayed an interest in the case is Senator Voorhees, who has had one or two interviews with Secretary Gresham, and has piresented to him in a strong light the importance, as well as the propriety, of the United States investigating the question of Waller's treatment. After having seen the secretary said he had already placed in the possession of Ambussador Eurits at Paris all the facts that had come to his knowledge, and had given him instructions to thoroughly investigate the case. The facts that had come to his knowledge, and had given him instructions to thoroughly investigate the case. But, so far as the facts are know Mr. Waller obtained this concession in a perfectly legitimate manner, and his title must be protected. Our government has uniformly held, notably in cases arising in Central America, that an American citizen cannot be dispossessed of a concession, so long as he complies with its terms, by any revolution in the government of the country where it may be situated. The rule of international law is clear as to the preservation of the individual's title in such cases, and having laid down this destrine in our relations with the weaker nations of this continent, the state department can hardly do less than maintain it as against France.

The information reaching Washington wis the details of the charge under which Were rules convicted as a street.

The information reaching washington was intended to be a decisive stroke. The arrangements for the move were guarded with the utmost secrecy. In some way, however, Waller learned of the French movement, and its said to have convered full information to the Hovas. The latter quickly armed the threatened town, so that when the French soldlers appeared they were met by an effective resistance. Instead of taking the blace by surprise, they found every one alert to the atrack.
